User-focused Front-End Web Developer and UX/UI Designer with a background in education and lifelong dedication to learning. As a teacher, I communicated and collaborated well with others as well as honed complex problem solving and critical thinking skills. I transitioned to web development due to interest in and a passion for combining creativity and problem solving to develop user-friendly websites and applications.

At the University of Arizona Full Stack Coding Boot Camp, I learned how to use JavaScript, React, APIs and AJAX, among other programming languages and technologies. I'm looking forward to leveraging my background in education to solve complex problems with speed and skill.

Technical Skills: HTML, CSS, Bootstrap, JavaScript, jQuery, React, Redux, Node.js, Express, APIs and AJAX
